

I support the Comment submitted by The American Radio Relay League concerning Docket ET 03-104. I believe the comments made by proponents of Broadband over Power Line (BPL) have no scientific data to support approval of this docket at this time. Further research into BPL will show the great irreparable interference this technology will cause to services licensed to operate in the 2 MHz - 80 MHz frequency range. Approval of ET 03-104 would violate the existing FCC rules on non-interference and would be contrary to the best interest of the public.

Thank you,

Ralph E. Bugg
